

# 2-Factor Authentication

The 2-Factor Authentication (2FA) feature is integrated into your Integral Wealth Portal; it is an important security measure to safeguard your personal financial data. 2FA works by sending a PIN to your phone to use when logging in.

## Initial Enrollment

1. Upon logging in, you will be required to register a primary phone number to be used for 2FA verification. Enter your phone number and click **Enroll**.

**2-Factor Authentication**

Please enroll in 2 Factor Authentication by entering your phone number below.

You will be sent a verification code via text message. To request a phone call, enroll and proceed to the next page.

What phone number would you like to use to receive the verification code?

**Enroll**

2. Once you have received your PIN, enter the 6-digit code into verification field and click **Verify**. You also have the option to click the **Call** link to have the verification code delivered to you in an automated phone call. As the code expires after 10 minutes it may be necessary to click the **Resend** link to receive a new PIN verification code.

**Enter Verification Code**

We just sent you a text message with a verification code. Enter it to verify your phone.

Please note that text message delivery can take a minute or more.

Can't receive texts or prefer a call? [Call](#)

**Verify**

Didn't receive a text message? [Resend](#)

3. The system will now prompt you to set up a recovery phone; do not use the same number as your primary phone. The recovery number will be used if you do not have access to your primary phone while trying to log in.

## Settings

There are two levels of security to choose from, Standard or High.

### Standard Security:

Requires PIN entry when “at-risk activity” has been identified. Select this option if you prefer only to be prompted with additional security when our system detects a potential threat like a log-in from a foreign country.

### High Security:

Requires a PIN be entered every time you log into the system. Select this option if you prefer to use the highest level of security available.

1. To change your security settings, click the **Settings** link in the top right of your website. From there, choose **Security**.
2. Select your security level, then click **Save** when done. Note that you can also change your primary or recovery phone number here.

## Troubleshooting

### Issue:

You do not have access to your primary phone number.

### Solution:

Click **More Options**; you can use your recovery number or click the link to contact Colman Knight advisor for one-time access:

The screenshot displays a three-step troubleshooting process for 2-Factor Authentication:

- 1 Enter Verification Code**: A screen where a user is prompted to enter a verification code sent via text message. It includes a text input field with a lock icon and the placeholder "6-Digit Verification Code", a "Sign In" button, a "More Options" button (highlighted with a red box), and a "Resend" link.
- 2 2-Factor Sign In Options**: A screen showing options to receive a verification code. It lists "Primary Phone: (\*\*\* ) \*\*\*- \*\*47" and "Recovery Phone: (\*\*\* ) \*\*\*- \*\*57" (with a red arrow pointing to the number). Each phone number has "Text Me" and "Call Me" buttons. At the bottom, there is a link "Contact Mark Masters for One Time Access" (with a red arrow pointing to it).
- 3 One Time Access**: A screen displaying the One Time Access code "566" and a "Back to More Options" link.

### Issue:

You entered your PIN incorrectly 3 times and your account has been locked.

### Solution:

To unlock your account, you will need to contact Colman Knight.
